

# EVELYN DAMARYS PULIDO MENDEZ

Colima, Mexico | +52 312 199 9316 | hello.evepulido@gmail.com | [LinkedIn](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

---

**UX/UI Designer & Design Technologist** with a software engineering background, specialized in designing accessible, human-centered digital products (WCAG 2.1 AA). Combines user research, wireframing, and design systems in Figma with interactive prototyping to bridge the gap between design and engineering. Delivers intuitive web interfaces that reduce cognitive load, optimize user flows, and ensure seamless design handoff.

## TECHNICAL SKILLS

---

- **Product & UX Design:** User research, wireframing, user flows, interactive prototyping, design systems, usability testing, WCAG 2.1 AA.
- **Design Tools:** Figma (Auto-layout, Components, Variants), Figma, interactive prototypes, design tokens.
- **Frontend & Design Technologist:** HTML5, CSS3, JavaScript (ES6+), React, Bootstrap 5, responsive design, cross-browser compatibility.
- **Collaboration & Workflow:** Git, GitHub, Jira, Postman, Agile/Scrum, AI design and development tools.

## WORK EXPERIENCE

---

### UX/UI & Frontend Developer, Universidad de Colima

September 2025 - March 2026 | On-site (Colima, Mexico)

- Architected and designed a responsive, multi-role admin dashboard in JavaScript and Bootstrap 5, streamlining navigation and operational workflows for university officials.
- Adapted wireframes into responsive web interfaces using the university's style guide and custom Bootstrap theme, ensuring institutional brand consistency across administrative workflows.
- Implemented an automated static HTML/JSON publishing module, eliminating 100% of direct database queries on the public portal and optimizing end-user load performance.

### UX/UI Designer & Frontend Developer, Freelance

August 2024 - February 2025 | Remote (Colima, Mexico)

- Designed end-to-end user flows, Figma interactive prototypes, and responsive web interfaces for a clinical platform focused on breast cancer risk assessment.
- Reduced patient cognitive load and intake friction by restructuring complex medical questionnaires into an intuitive, multi-step flow with real-time risk indicators.

## EDUCATION

---

### B.S. in Software Engineering, Universidad de Colima

Expected Graduation: June 2027 | Colima, Mexico

## CERTIFICATIONS

---

- **Create High-Fidelity Designs and Prototypes in Figma**, Google (May 2026)
- **5-Day AI Agents: Intensive Vibe Coding Course**, Kaggle (July 2026)
- **Python Essentials 1**, Cisco Networking Academy (March 2026)

## LANGUAGES

---

- **Spanish:** Native
- **English:** B2 (Professional Working Proficiency), TOEFL ITP Certification (567 points)
